

Specification

Sensor Name	Value	Unit
Ignition State	ON	-
LED Control Input Voltage	1.8	V
LED Control Output Value (PWM)	52	-
Blue Optical Sensor Input Voltage	4.8	V
Contact Sensor Input State (Not Secured)	OFF	-
Contact Sensor Input State (On Secured)	OFF	-
Contact Sensor Input State (On Secured)	OFF	-
Contact Sensor Input State (On Secured)	OFF	-
Contact Sensor Input State (On Secured)	OFF	-
Contact Sensor Input State (On Secured)	OFF	-

Fig.1) Normal current data

This current data is nothing but an example at certain condition. Thus, the real current data could be different from this example.
